Disclaimer

Forward-looking statements included in this presentation are prepared based on our expectations and projections in light of the information currently available to us, which involve various risks and uncertainties (including, but not limited to, economic trends, market demand and the highly competitive semiconductor industry). Such risks and uncertainties may cause our actual results to be materially different from any future results expressed or implied by these forward-looking statements. We undertake no obligation to update any forward-looking statement included herein.

The information and projections regarding the flash memory industry included in this presentation are derived from information currently available to us. Whilst this presentation is provided in good faith, it does not purport to be comprehensive and has not been independently verified. We make no representations with respect to such information and projections.

This presentation includes Non-GAAP measures we use internally in making decisions. Non-GAAP measures exclude non-recurring items and other specific items from IFRS-based figures to more easily evaluate the Group's fundamental profitability. We believe that disclosing non-GAAP measures makes it easier for stakeholders to compare the Group's performance with that of other companies in the same industry and against previous fiscal years. Non-GAAP measures are used internally by us and are not accounting items based on IFRS, and have not been audited or reviewed by auditors. Therefore, such non-GAAP measures may not accurately reflect the Group's financial condition or operating results. "Non-recurring items" are temporary gains and losses that we consider should be excluded for non-GAAP measures, including the impact of purchase price allocation (PPA) arising from mergers and acquisitions, and the impact of significant changes to tax policies. "Other specific items" are gains and losses that we consider difficult to compare with other companies due to factors such as different accounting standards, including costs for the fiscal year recorded under the Group's continuous service and performance-linked stock-based remuneration plans.

This presentation includes internal measures which our management relies upon in making decisions (the "Non-GAAP Financial Measures") that differ from financial measures prepared in accordance with International Financial Reporting Standards ("IFRS"). The Non-GAAP Financial Measures, which are IFRS measures plus adjustments made for non-recurring items, have not been audited or reviewed by auditors. Therefore, such Non-GAAP Financial Measures may not accurately reflect our financial condition or operating results.

This presentation was prepared to provide information on our consolidated financial results for the fiscal year ended March 31, 2026 and does not constitute, or form a part of, any offer or solicitation to purchase or subscribe for securities in any jurisdiction.
